CALL FOR PAPERS

Agri-Food Systems Transformation: Sustainability, Resilience, and the Role of Technology

IFAMR Guest Editors

Rui Mao, Zhejiang University, China
Aleksan Shanoyan, Kansas State University, United States
Kate Brooks, University of Nebraska Lincoln, United States

General Statement

IFAMR is actively working with academic associations to provide a joint platform for scholars and practitioners around the world to highlight the latest research advances and solutions to address imminent challenges to the global food and agribusiness system.

This year, IFAMR and the AAEA Agribusiness Economics & Management (AEM) Section have partnered to publish an IFAMR Special Issue: Agri-Food Systems Transformation: Sustainability, Resilience, and the Role of Technology, devoted to current topics surrounding new and emerging technologies, risk and resilience, and sustainable development of agri-food systems in both advanced and developing economies. The special issue invites submissions from the members of the AEM section and the broader network of applied agricultural economics scholars.

Areas of focus

I. Innovations and technological development in agribusiness management.
   Examples of topics in this area include:
   - Biotechnology in the agri-food system and consumer acceptance
   - Digital transformation and adaptation in the agri-food system
   - Institution and organization innovations for modern agribusiness management
II. Risk management and resilience of the food and agribusiness system.
   Examples of topics in this area include:
   - Impacts of COVID-19 on food security and agri-food system resilience
   - Agricultural and agribusiness adaptation to climate change
   - Risk management perceptions, instruments and technologies in agriculture

III. Sustainability of the agri-food sector and inclusive rural development.
   Examples of topics in this area include:
   - Green consumption and sustainability along the agri-food chains
   - Inclusiveness of the agri-food sector and urban-rural integration
   - Sustainability impacts of market, fiscal and trade regulations

Submission Instructions

**Step 1:** Authors must submit 1000-word extended abstracts in MS Word or pdf format to the IFAMR Office of Editor-in-Chief email address at ifamroeic@zju.edu.cn on or before June 15th, 2022.

**Step 2:** For the selected abstracts, authors will submit full papers on or before July 1st through the Editorial Manager Portal of IFAMR. The detailed instructions for the submission of full papers will be provided with the notice of selected abstracts. When submitting the full paper to the special issue authors will select "Special Issue: Agrit-Food Systems Transformation: Sustainability, Resilience, and the Role of Technology." in the Article Type to have their manuscripts to undergo an expedited review process. Although each paper would be reviewed independently, accepted papers will be published together along with a summary of the issue's topic. Papers will be published "in press" as soon as possible after acceptance. But the completed issue is expected in early 2023.

The format of complete manuscripts should follow IFAMR’s author guidelines that can be found at: https://www.wageningenacademic.com/pb-assets/wagen/files/ifamr/IFAMRGuidelines-1642504048567.pdf

Final manuscripts should be uploaded using IFAMR’s online submission portal: https://www.editorialmanager.com/ifamr/default1.aspx

Special Issue Timeline

**August 1st, 2022:** Submission deadline for extended abstracts (approximately 1000 words)
**August 15th, 2022:** Authors informed of abstract acceptance and invited to submit full papers
**September 15th, 2022:** Submission deadline for full papers for peer-review
**September 15th – December 1st, 2022:** Expedited peer-review and revision process
**December 15, 2022:** Notice to authors of the final decision
The special issue is expected to be published in early 2023.
