AgBioResearch

Leading innovation in food, natural resources and innovation

MSU AgBioResearch engages in innovative, leading-edge research that combines scientific expertise with practical experience to generate economic prosperity, sustain natural resources and enhance the quality of life in Michigan, the nation and the world. It encompasses the work of more than 300 scientists in six MSU colleges – Agriculture and Natural Resources, Communication Arts and Sciences, Engineering, Natural Science, Social Science and Veterinary Medicine -- and a network of 13 research centers across the state.

Changing the **FACE** of science

How will food and related resource systems evolve to serve a 2050 global population over 9 billion, 70% of whom will live in metro regions?

International Food and Agribusiness Management Review

Supporters and Partners

The IFAMR Open Access Project is supported in part through contributions from these institutions. Scholars, practitioners, students, and policymakers may now read and download the most current and archival content from the IFAMR website. The Board of Directors of the International Food and Agribusiness Management Association feel that open and immediate access to IFAMR's articles and case studies will dramatically elevate the quality of scientific inquiry and instruction around the world in the field of agribusiness. If you would like to support this effort please contact: Kathryn White, Email: ifamr@ifama.org.
