Her research interests involve innovation management, market entry strategies and new business development with a focus on agribusiness and life sciences. She has published several articles in the innovation and strategic technology management literature.

Lowell Catlett is a Regent’s Professor at New Mexico State University and Dean of the College of Agriculture and Home Economics. He is an exciting futurist whose knowledge of technologies and their implications on the way we will live and work is addressed in his varied and upbeat presentations. Agriculture will change more in the next decade than in the last century. Dr. Catlett will share six major trends which are creating more opportunities than ever before as consumers and producers are aligned in ways that generate agricultural markets in medicine, ecology, bio security, entertainment and lifestyles. These six trends change all of the rules and will make agriculture the nation’s largest industry.

Bruce Clark is a principal in Marler Clark in Seattle. He has an extensive background in civil litigation, including personal injury, product liability and professional malpractice actions. Mr. Clark did defense work at the Seattle firm Karr Tuttle Campbell for nearly 15 years before he joined his present partners in a practice devoted to representing injured persons. In 1993, Mr. Clark became involved in foodborne illness litigation as an attorney for Jack in the Box restaurants in its E. coli O157:H7 personal injury litigation. The Jack in the Box litigation spanned more than four years and involved more than 100 lawsuits in four states. Since that time, Mr. Clark has been continuously involved in food and waterborne illness litigation involving bacterial, viral, and parasitic agents in settings ranging from large scale outbreaks to individual cases. He has extensive expertise in the medical, microbiological, and epidemiological aspects of foodborne illness cases gleaned from more than a
